

Universidad de Guanajuato

Clave de convenio: C/PROFEXCE-2020-11MSU0013Z-5-19

Proyecto: FORTALECIMIENTO DE LA EXCELENCIA EDUCATIVA DE LA UNIVERSIDAD DE GUANAJUATO

Clave de Proyecto: P/PROFEXCE-2020-11MSU0013Z-01

1.- Valoración General del avance o cumplimiento académico del proyecto

Se tiene un cumplimiento por el orden del 96.7% de las metas del proyecto, debido la atención satisfactoria del siete de las ocho metas suscritas. La meta que se cumplió parcialmente, en un 67%, (MA 3.3 Profesores capacitados para evaluación y transferencia de tecnología, conocimiento y resultados de investigación, mediante cursos, talleres y seminarios) fue debido a la demora en la radicación de los recursos financieros de este programa, ya que cuando éstos se recibieron, los profesores se encontraban en actividad docente o en la atención de otras actividades de sus planes de trabajo anuales y de tal manera la actividad programada no pudo llevarse a cabo en fecha posterior..

2.- Problemas atendidos

Se atendieron las necesidades vigentes en materia de infraestructura educativa, tales como equipos de cómputo para el desarrollo de plataformas educativas con las cuales se diversifican las modalidades de estudio. Se avanzó en satisfacer la necesidad de contar con equipamiento para desarrollar actividades académicas que precisan de mediaciones tecnológicas en tiempo real (p.e. sistemas de video conferencia). También se atendieron los requerimientos, para el año 2020, relacionados con recursos digitales e impresos para el desarrollo de la docencia e investigación, mediante la adquisición de bibliografía actualizada. Finalmente, se llevaron a cabo cursos en línea dirigidos a estudiantes, con los cuales se coadyuva al aprendizaje permanente en áreas complementarias a su formación disciplinar, tales como la apreciación cultural o artística

3.- Fortalezas aseguradas

Se contó con recursos que permitieran dar mantenimiento a equipo de laboratorios a fin de asegurar el desarrollo de las actividades académicas realizadas por los profesores. La bibliografía adquirida contribuye a que los profesores desarrollen investigación y mantengan indicadores de calidad reconocidos por instancias externas, tales como el PRODEP o el SNI.

4.- Desarrollo y continuidad de programas educativos de calidad

El 70% de los programas educativos de licenciatura evaluables cuentan con reconocimiento de calidad. Asimismo, se cuenta con 13 programas reconocidos por su calidad a través de organismos de acreditación Internacional. En materia de posgrados, el 52% cuentan con reconocimiento de calidad otorgado por el Padrón Nacional de Posgrados de Calidad (PNPC).

5.- Atención a las recomendaciones de organismos evaluadores y/o acreditadores (CIEES, COPAES, PNPC, otros)

Se contribuyó en la atención de tres de las observaciones comunes que emiten los organismos evaluadores: actualizar los planes de estudios; contar con acervo bibliográfico actualizado y disponer de recursos tecnológicos para el desarrollo de la docencia. Al respecto, el 80% de los programas educativos que conforman la oferta de la Universidad de Guanajuato, han sido actualizados o modificados para asegurar su pertinencia y el reconocimiento a su calidad. Se adquirió acervo bibliográfico para dotar a 26 bibliotecas que brindan servicio a los programas educativos. También, a través de la dotación de recursos electrónicos en 26 bibliotecas, se puso a disposición de la comunidad universitaria material electrónico para el desarrollo de la docencia y la investigación.

6.- Contribución a la mejora de los indicadores planteados en el Anexo XIII del PROFEXCE

Se han mantenido por encima de la media nacional, los niveles de desempeño de indicadores asociados a la "Capacidad Académica", tales como: el 80% de los PTC cuentan con reconocimiento de perfil deseable PRODEP; el 85% de los PTC cuentan con grado de doctor; el 57% de los PTC están adscritos al Sistema Nacional de Investigadores y el 46% de los

Cuerpos Académicos están Consolidados. Asimismo, se avanza en la consolidación de indicadores relacionados con la "Competitividad Académica", de los cuales destacan que el 70% de los PE evaluables de licenciatura están reconocidos por organismos externos y el 52% de los Posgrados cuentan con reconocimiento por el Padrón Nacional de Posgrados de Calidad (PNPC), cifra que ubica a la Universidad de Guanajuato en el octavo lugar por el número de programas en el PNPC y el tercero por programas de competencia internacional entre las Universidades Públicas Estatales. Estos logros estatales y nacionales son el resultado del trabajo continuo de mejora en los programas de posgrado que permiten el crecimiento sostenido en el PNPC

7.- Número de estudiantes y profesores beneficiados

	Profesores Beneficiados		
	Movilidad Académica		
	Nacional	Internacional	Total
Profesores de Tiempo Completo		23	23
Profesores de Medio Tiempo			
Profesores de Asignatura		4	4
Total	0	27	27

	Alumnos Beneficiados				
	Movilidad Académica				Total
	Complemento de la formacion		Reconocimiento de créditos		
	Nacional	Internacional	Nacional	Internacional	
TSU/PA		2			2
Licenciatura	6	239	6	58	309
Posgrado		48			48
Total	6	289	6	58	359

8.- Impacto en la modernización de la infraestructura (servicios de apoyo académico)

Gracias a la ejecución de cinco acciones, a saber, se dio un impulso a la modernización de infraestructura de apoyo a la actividad académica, en beneficio de los estudiantes y profesores: 1) adquisición de equipo de cómputo portátil para uso de estudiantes que conforman la quinta generación del Programa de Equidad Regional; 2) incremento de las colecciones bibliográficas de las bibliotecas universitarias; 3) adquisición de mobiliario para la organización, resguardo, control de la circulación y préstamo externo de material bibliográfico; 4) mantenimiento a equipo de laboratorio y 5) equipamiento para favorecer el desarrollo de actividades académicas, tales como: clases digitales, entrevistas, ponencias, entre otras.

9.- Impacto en la capacitación de los profesores y de los cuerpos académicos

Para fortalecer el ejercicio de la docencia universitaria, se realizaron dos ediciones del "Diplomado en Competencias para la Docencia Universitaria", con una duración de 125 horas. Se implementó la estrategia "Dialogando en Comunidad sobre Tecnología Educativa" cuyo objetivo fue brindar asesoría a profesores (durante ocho sesiones) en su transición del quehacer docente presencial hacia el semipresencial o virtual y favorecer el aprendizaje de los estudiantes. Para favorecer la práctica reflexiva de la docencia, se dio seguimiento a seis "Comunidades de Aprendizaje Disciplinares de Práctica Docente", en las áreas de salud; económico administrativas; ingenierías; ciencias sociales y humanidades, e ciencias naturales y exactas y; arquitectura, arte y diseño; en las cuales profesores participan en un sistema de aprendizaje social en torno a temáticas tales como: diseño de guías docentes, estrategias de enseñanza y aprendizaje, evaluación progresiva de los aprendizajes, contención y acompañamiento durante la pandemia. El total de profesores que participó en alguna o varias de las estrategias antes referidas fue de 339 profesores de nivel superior. Adicionalmente, un total de 702 profesores realizaron cursos en línea autogestivos relacionados con el fortalecimiento de habilidades en Tecnologías de la Información y Comunicación y Tecnología Educativa. Asimismo, 19 docentes de la Universidad concluyeron satisfactoriamente la "Especialización en Docencia para la Multimodalidad Educativa". Además, durante el 2020 y a través de las distintas ediciones del "Taller para la digitalización de unidades de aprendizaje", se tuvo

la participación de 55 docentes. Finalmente, derivado de la implementación del semestre virtual se capacitaron en un esquema masivo 2,686 docentes con el curso "Mi aula digital para profesoras y profesores UG".

10.- Impacto en la formación y atención integral del estudiante

El curso de inducción para primer ingreso se rediseñó para modalidad virtual y en éste participaron 947 estudiantes. Se tuvieron dos ediciones del "Diplomado en Desarrollo Humano", con participación de estudiantes de 166 estudiantes de los últimos años de carrera. Mediante el "Programa de Formación Integral del Estudiante" se realizaron 32 talleres en temáticas de salud integral, interculturalidad, emprendimiento e innovación, cultura de paz y sustentabilidad, con una cobertura de 2,220 estudiantes beneficiarios. Se realizó capacitación en el manejo del software de trayectoria escolar a los Coordinadores de Programa Educativo en los cuatro Campus de la Universidad, dicha capacitación les permitirá identificar estudiantes en riesgo de deserción, detección de UDA de alta reprobación e identificación de los factores de riesgo que pueden alterar la trayectoria de los estudiantes. Durante el semestre agosto – diciembre 2020, se atienden a 38910 estudiantes en Tutoría, acompañados por 1455 profesores – tutores, brindando un total de 32759 entrevistas tutoriales. Se inicia con la asignación de visto bueno para alta y baja de UDA de manera sistematizada a través de la Carpeta Electrónica del Tutor. Se puso a disposición de los tutores del demo de la Plataforma del Programa Institucional de Tutoría, misma que tiene habilitados los módulos del tutor, coordinador de tutoría de división y coordinador de tutoría institucional. Se han impartido los cursos "La tutoría virtual" y "Curso para el uso de la nueva plataforma del programa institucional de tutoría", habiendo capacitado aun total de 1300 profesores en los meses de agosto a octubre de 2020. Se realiza acompañamiento con tutores pares, con la participación de 106 estudiantes, atendiendo a 543 estudiantes.

11.- Producción científica

Libros

- 1.- Desplazamientos de la literatura mexicana actual
- 2.- La experiencia literaria en lenguas indígenas mexicanas
- 3.- El ojo de Orfeo
- 4.- Genética

- 17.- Characterization of the reaction environment in flow reactors fitted with BDD electrodes for use in electrochemical advanced oxidation processes: A critical review
- 18.- New bacteriocin-like substances produced by *Streptomyces* species with activity against pathogens
- 19.- Evaluating India's energy targets using real options approach
- 20.- Magnetic parameters as proxies for anthropogenic pollution in water reservoir sediments from Mexico: An interdisciplinary approach
- 21.- Chitinases of *Bacillus thuringiensis*: Phylogeny, Modular Structure, and Applied Potentials
- 22.- Resveratrol protects human bronchial epithelial cells against nickel-induced toxicity via suppressing p38 MAPK, NF-kappa B signaling, and NLRP3 inflammasome activation
- 23.- Diffusion of Anisotropic Particles in Random Energy Landscapes-An Experimental Study
- 24.- Simple supergravity model of inflation constrained with Planck 2018 data
- 25.- Cancer prevention programmes in Mexico: are we doing enough?
- 26.- Iodine(III)-catalyzed benzylic oxidation by using the (PhIO)(n)/Al(NO₃)₃ system
- 27.- Rings and ovoid heart: OCIR. A new cardiomyopathy? Family genetic findings and multimodality imaging analysis. A rare cardiac phenotype and review of the literature
- 28.- Carbon content loss and recovery processes in aerial biomass in the forested areas of the Nevado de Toluca Flora and Fauna Protected Natural Area during the period 2000-2013
- 29.- Multi-objective optimization of intensified processes for the purification of levulinic acid involving economic and environmental objectives. Part II: A comparative study of dynamic properties
- 30.- Analysis of intensified sustainable schemes for biobutanol purification
- 31.- Photographic records confirming the presence of Wild Turkey (*Meleagris gallopavo* ssp.) in the Sierra Gorda Biosphere Reserve of Guanajuato, Mexico
- 32.- aeBlue Chromoprotein Color is Temperature Dependent
- 33.- Stereoselectivity of the captodative alkenes 1-acetylvinyl arenecarboxylates in Diels-Alder reactions with cyclic dienes and stereospecific rearrangement of their bicyclo[2.2.n] alpha-ketol adducts
- 34.- Tear down the walls. From urban history to urban studies with a historical perspective: theoretical and methodological proposals from an interdisciplinary dialogue
- 35.- Advanced exergy and exergoeconomic analysis for a polygeneration plant operating in geothermal cascade
- 36.- Does the earthworm favor the survival and growth of *Abies religiosa* (Kunth) Schltdl. & Chain. seedlings in a nursery?
- 37.- Nonlinear mode decomposition-based methodology for modal parameters identification of civil structures using ambient vibrations
- 38.- Time of Revolts four: red note and tragic sense. [The signature of Jose Revueltas]
- 39.- Event-driven implementation of deep spiking convolutional neural networks for supervised classification using the SpiNNaker neuromorphic platform
- 40.- Effect of 6-benzylaminopurine and potassium nitrate on the in vitro micropropagation of *Laelia anceps* subsp. *anceps* (Orchidaceae)
- 41.- Optimization of a Linear Fresnel Reflector Applying Computational Fluid Dynamics, Entropy Generation Rate and Evolutionary Programming
- 42.- Switchable and tunable multi-wavelength fiber laser based on a core-offset aluminum coated Mach-Zehnder interferometer
- 43.- Mineralization of Acid Red 1 azo dye by solar photoelectro-Fenton-like process using electrogenerated HClO

- and photoregenerated Fe(II)
- 44.- Removal of fluoride and hydrated silica from underground water by electrocoagulation in a flow channel reactor
 - 45.- Hydrophilic MoS₂/polydopamine (PDA) nanocomposites as the electrode for enhanced capacitive deionization
 - 46.- Proteomic analysis of *Sporothrix schenckii* cell wall reveals proteins involved in oxidative stress response induced by menadione
 - 47.- Simultaneous biological nitrification and desulfurization treatment of ammonium and sulfide-rich wastewater: Effectiveness of a sequential batch operation
 - 48.- Enhancing the voltage and discharge times of graphene supercapacitors depositing a CNT/V₂O₅ layer on their electrodes
 - 49.- Effects of different light conditions on ammonium removal in a consortium of microalgae and partial nitrifying granules
 - 50.- Distributed UFIR Filtering over WSNs with Consensus on Estimates
 - 51.- Reducing thermal imbalances and flow nonuniformity in solar collectors through the selection of free flow area ratio
 - 52.- Optimal extraction of EMG signal envelope and artifacts removal assuming colored measurement noise
 - 53.- Angstrom configuration for absolute measurement on heat losses of metal sample by active thermography
 - 54.- Comparative evaluation of two *Fusarium oxysporum* f. sp. *lycopersici* strains grown on two different carbon sources: LC-MS - based secretome study after *in vivo* ¹⁵N metabolic labeling
 - 55.- Converting tequila vinasse diluted with tequila process water into microalgae-yeast flocs and dischargeable effluent
 - 56.- Robust inertial navigation system/ultra wide band integrated indoor quadrotor localization employing adaptive interacting multiple model-unbiased finite impulse response/Kalman filter estimator
 - 57.- Empirical Bayesian Kriging method to evaluate inter-annual water-table evolution in the Cuenca Alta del Río Laja aquifer, Guanajuato, México
 - 58.- Planetary motion cross bar friction test for application in machining process
 - 59.- Effect of Nopal (*Opuntia ficus indica*) Consumption at Different Maturity Stages as an Only Calcium Source on Bone Mineral Metabolism in Growing Rats
 - 60.- Fluoxetine for motor recovery after acute intracerebral hemorrhage, the FMRICH trial
 - 61.- The combination of linagliptin, metformin and lifestyle modification to prevent type 2 diabetes (PRELLIM). A randomized clinical trial
 - 62.- Tuning the pH-responsiveness capability of poly(acrylic acid-co-itaconic acid)/NaOH hydrogel: Design, swelling, and rust removal evaluation
 - 63.- Photocatalytic removal of 4-chlorophenol present in water using ZrO₂/LDH under UV light source
 - 64.- Flavour and CP predictions from orbifold compactification
 - 65.- CFD simulation of biphasic flow, mass transport and current distribution in a continuous rotating cylinder electrode reactor for electrocoagulation process
 - 66.- Determination of major and minor elements in Mexican red wines by microwave-induced plasma optical emission spectrometry, evaluating different calibration methods and exploring potential of the obtained data in the assessment of wine provenance
 - 67.- Evolution of an electron beam pulse influenced by coulomb collision effects in the solar corona
 - 68.- A numerical analysis of the energy and entropy generation rate in a Linear Fresnel Reflector using computational fluid dynamics
 - 69.- The effects of surface roughness on the hemming process of aluminum thin plates

- 70.- Thermal, morphological and structural characterization of a copolymer of starch and polyethylene
- 71.- Parametric optimization of roll-hemming process in oblique planes with linear and non-linear trajectories
- 72.- Design of dividing wall columns involving sustainable indexes for a class of quaternary mixtures
- 73.- Monte Carlo simulations and perturbation theory for highly correlated fluids: The Lennard-Jones core softened potential case
- 74.- Bioactivity of flexible graphene composites coated with a CaSiO₃/acrylic polymer membrane
- 75.- An Improved Iterative FIR State Estimator and Its Applications
- 76.- Green synthesis of N-substituted benzimidazoles: The promising methicillin resistant *Staphylococcus aureus* (MRSA) inhibitors
- 77.- Optical Fiber FP Sensor for Simultaneous Measurement of Refractive Index and Temperature Based on the Empirical Mode Decomposition Algorithm
- 78.- Effect of a family and interdisciplinary intervention to prevent T2D: Randomized clinical trial
- 79.- Tuning the nonlinear optical properties of Au@Ag bimetallic nanoparticles
- 80.- Impact of operational and design variables on the thermodynamic behavior of a simulated 500?kw ng-fueled solid oxide fuel cell stack
- 81.- Sleep Extension Increases the Effect of Caloric Restriction Over Body Weight and Improves the Chronic Low-Grade Inflammation in Adolescents With Obesity
- 82.- Para-diplomacy, soft power and municipal international cooperation: The case of Guanajuato [Paradiplomacia, poder suave y la cooperación internacional municipal: El caso de Guanajuato]
- 83.- Visual quality assessment of malting barley using color, shape and texture descriptors
- 84.- Multithreading Programming for Feature Extraction in Digital Images
- 85.- Assessment of the Ground Reaction Forces on Metatarsal Foot Bones Due to Changes on Pinball Region Contact
- 86.- Optimization of sorghum, rice, and amaranth flour levels in the development of gluten-free bakery products using response surface methodology
- 87.- The role of silica and alkaline earth metals with biomolecules in the biomineralization processes: the eggshell's formation and the crystallization in vivo for x-ray crystallography
- 88.- Silver Nanoparticles Enhance Thermoluminescence and Photoluminescence Response in Li₂B₄O₇ Glass Doped with Dy³⁺ and Yb³⁺
- 89.- Experimental investigation of the impact of a destination promotional video with physiological and self-reported measures
- 90.- A toolkit for twisted chiral superfields
- 91.- Effect of a supplementation with two quelites on urinary excretion of arsenic in adolescents exposed to water contaminated with the metalloid in a community in the state of Guanajuato, Mexico

- 96.- Seasonal variation in the prevalence of Varroa, Nosema and Acarapis in hives from which queen bee mating nuclei are produced
- 97.- Postharvest heat treatments to inhibit *Penicillium digitatum* growth and maintain quality of Mandarin (*Citrus*

reticulata blanco)

98.- Electroanalytical determination of heavy metals in aqueous solutions by using a carbon paste electrode modified with spent coffee grounds

99.- Design and kinematic analysis of a new 3-DOF spherical parallel manipulator for a prosthetic wrist

100.- Interface for Contour Extraction and Determination of Morphologic Parameters in Digital Images of Footprints Based on Hernandez-Corvo Protocol

101.- Assessment of Plantar Pressure in a Foot Finite Element Model Considering a Sliding Contact Between Soft Tissues

102.- Fluorescent carbon nanoparticles synthesized from bovine serum albumin nanoparticles

103.- Entrepreneurship and Innovation Based on the RIEMPEI Model: Inequality of Opportunities in Mexico

104.- Preliminary Design Study of a Fast-Ramping Magnet for Preconcept Design of an Electron-Ion Collider at Jefferson Lab

105.- A Hybrid EDA/Nelder-Mead for Concurrent Robot Optimization

106.- Influence of the surface modification of titanium dioxide nanoparticles TiO_{2} under efficiency of silver nanodots deposition and its effect under the properties of starch-chitosan (SC) films

107.- Development of a Co^{2+}/PMS process involving target contaminant degradation and PMS decomposition

108.- Calcium Deficiency in Diet Decreases the Magnesium Content in Bone and Affects Femur Physicochemical Properties in Growing Rats

109.- PEDOT/Superoxide Dismutase Electrode Surface Modification for Superoxide Bioelectrochemical Sensing

110.- Formation of Crystalline Silica-Carbonate Biomorphs of Alkaline Earth Metals (Ca, Ba, Sr) from Ambient to Low Temperatures: Chemical Implications during the Primitive Earth's Life

111.- Anti-toxoplasma, antioxidant and cytotoxic activities of *Pleopeltis crassinervata* (Fée) T. Moore hexane fraction

112.- Cuboidal liquid crystal phases under multiaxial geometrical frustration

113.- Reply to letter to the editor by Bonaventura et al.

114.- Microphotonics for monitoring the supramolecular thermoresponsive behavior of fatty acid surfactant solutions

115.- Structure and excited state dipole moments of oxygen containing heteroaromatics: 2,3-benzofuran

116.- Influence of surface chemistry of activated carbon electrodes on electro-assisted adsorption of arsenate

117.- An Electric-Circuit Model on the Inter-Tape Contact Resistance and Current Sharing for REBCO Cable and Magnet Applications

118.- Efficient hydrogen generation by $ZnAl_2O_4$ nanoparticles embedded on a flexible graphene composite

119.- Study on the interactions between [BMIM][SCN] and napthalene/dibenzothiophene: A theory-experiment comparison

120.- Enantioselective synthesis of tetrahydrocarbazoles via trienamine catalysis and their anxiolytic-like activity

121.- MoS_2 @sponge with double layer structure for high-efficiency solar desalination

122.- Structural design of an agricultural backhoe using TA, FEA, RSM and ANN

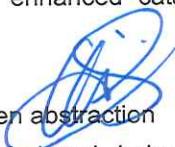

123.- Self-assembly montmorillonite nanosheets supported hierarchical MoS_2 as enhanced catalyst toward methyl orange degradation

124.- The Link between Gut Dysbiosis and Neuroinflammation in Parkinson's Disease

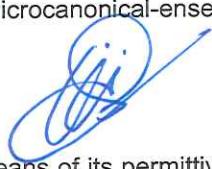

125.- Thermolysis of 2-azido-3-(R-anilino)-1,4-naphthoquinones. Nitrene insertion versus hydrogen abstraction

126.- Members of the nitronate monooxygenase gene family from *Metarhizium brunneum* are induced during the process of infection to *Plutella xylostella*

127.- Preliminary theoretical and experimental analysis of a Molten Carbonate Fuel Cell operating in reversible mode

- 128.- Heart Rate Variability and Gastric Electrical Response to a Cold Pressor Task in Youth with Functional Dyspepsia
- 129.- Distribution modeling of diazepam and chlorpheniramine between aqueous and non-polar phases in the presence of soy lecithin
- 130.- Conditions for continuous cultivation of Chlorella sorokiniana and nutrient removal from anaerobic digestion effluent of aquatic macrophytes
- 131.- Mood variations and personality traits in patients with epilepsy over the course of their menstrual cycle
- 132.- Anti-inflammatory and antinociceptive effects of an ethanol extract from Senna septemtrionalis
- 133.- Hidden Costs in the Physiology of Argia anceps (Zigoptera: Coenagrionidae) due to Pollution
